

Instructions for Importing Android Segmented Control View

Step 1: Extract AndroidSegementedControlView.zipx to location of choice

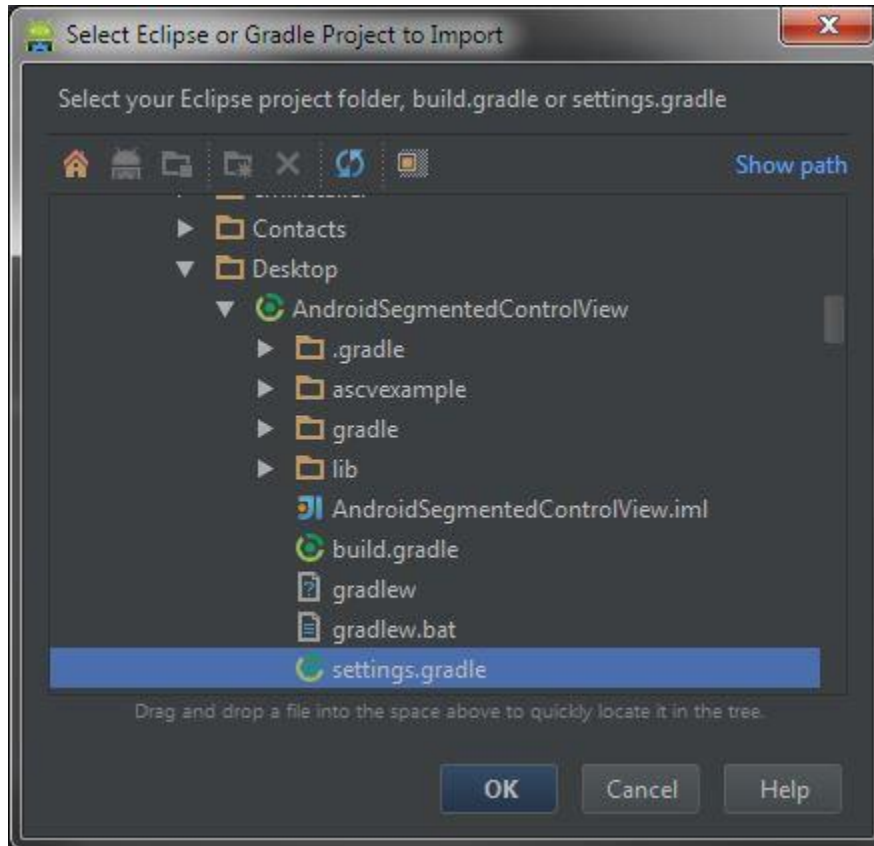

Step 2: Select “Import Non-Android Studio project” from Android Studio configuration screen

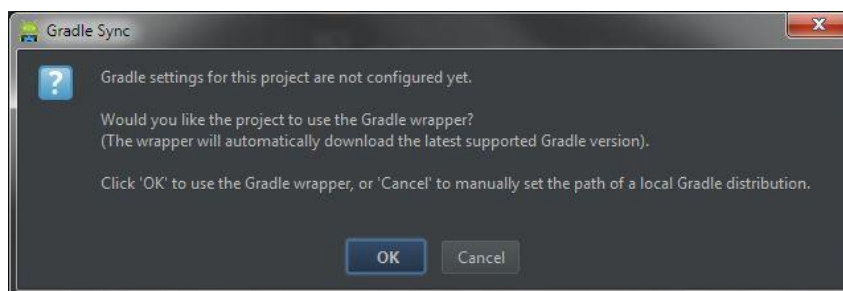

Alternatively, one can select “Import Project” from the File menu in the menu bar

Step 3: Select the “settings.gradle” file from the AndroidSegmentedControlView directory

Step 4: Click OK when asked if you want the project to use the Gradle wrapper

Step 5: Confirm that folder structure in Android Studio is accurate.
